Introduction

Computer Science & Engineering (Data Science) undergraduate with hands-on experience in **Java, Spring Boot, React.js, and Machine Learning**. Built **full-stack and AI-powered** applications including CropCare and BookSphere using REST APIs, MySQL, and modern development tools. Eager to contribute to **software development** while continuously learning new technologies.

Education

English School, Mangalwedha	2020 - 2021
SSC	96.40 %
English School Jr. College, Mangalwedha	2022 - 2023
HSC	70.00 %
KIT COLLEGE OF ENGINEERING, KOLHAPUR	2023 - 2027
B.Tech in Computer Science & Engineering(Data Science)	8.1/10 CGPA

Projects

CropCare – AI-Powered Smart Agriculture Platform Aug 2025 - Jan 2026

- Designed and enhanced a scalable full-stack agriculture platform using Spring Boot and React.js by implementing the **MVC architecture, RESTful APIs and MySQL integration**.
- Built and integrated a **Machine Learning–based crop recommendation module** that processes soil and weather data to provide crop suggestions.
- Incorporated a **plant disease detection module using a Deep learning model** and provided disease information with treatment recommendations.
- Built an **AI Farmer Assistant** using the Groq **API integration**, enabling farmers to ask agriculture-related questions and **receive intelligent, multilingual responses**.
- created and integrated a **MySQL database** using **Spring Data JPA/Hibernate**, **developed RESTful APIs**, and built a responsive UI with React.js and Tailwind CSS.
- Project URL** : <https://sanket-378.github.io/CropCare/>
- GitHub** - <https://github.com/Sanket-378/CropCare/>

BookSphere Jan 2025 – June 2025

- Improved a web-based Library Management System with dedicated dashboards for Students, Members, and Administrators, enabling **role-based access and secure authentication**.
- Implemented CRUD operations for books, users, announcements, and library records using **Java Servlets** and later migrated the application to Spring Boot following the **MVC (Controller–Service–Repository) architecture**.
- Created and integrated a MySQL database using **Spring Data JPA/Hibernate** to manage books, users, borrowing history, and issue/return transactions while maintaining data consistency.
- Enhanced book search, issue, return, and borrowing history modules with **server-side validation, session management, and automatic inventory updates**.
- Built a responsive user interface using HTML, CSS, and JavaScript, and deployed the application on **Apache Tomcat**.

Technical Skills

Programming Languages : Java, Python

Frameworks : Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security

Core Concepts : Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Web technologies : HTML, CSS, React JS

Databases : MySQL, PostgreSQL

Other Tools : Git, GitHub, Android Studio, Figma, IntelliJ, VS Code

Soft skills : Leadership quality, Communication skills, Quick learning, Teamwork & Collaboration

Certifications

- Completed **Udemy – Spring Boot React JS Full Stack Course For Beginners**
- Completed **GenAI Powered Data Analytics Job Simulation Certificate**

Achievements

Participated in National AI Hackathon - [Certificate](#)
